TRANSPORTATION OF NON-RESIDENT STUDENTS

Transportation service is not provided to nonresident open enrollment students as set forth in State Statutes 118.51 and 118.52. However, a child for whom the district is not required to provide transportation may ride a school bus at the parent's expense. Ridership will be available at any existing pick-up or drop-off point when excess bus capacity exists on the route. The district will not modify stops to accommodate open enrollment students. Parent contracts will be provided for each student at the amount specified by state statutes.
